Projects

QuickPark
Github: https://github.com/wasp0094/QuickPark_Project.git

QuickPark is a smart-parking application. It uses location tracking to display the available parking slots in nearby regions.

I contributed to Frontend, Github, and content writing in the project using HTML, CSS, JavaScript.

Perpetual Pocket
Github: https://github.com/Swati002/Perpetual-Pocket/tree/master

https://swati002.github.io/Perpetual-Pocket/

Web Layout for online daily service booking application using HTML, CSS, JavaScript.

File System Organizer
Tech Stacks : JavaScript, Node.js
With this project we can arrange files in specific directory according to their extension.

IPL-Scrapper
Tech Stacks : JavaScript, Node.js
Node Modules : request, cheerio, path, fs, xlsx

In this project, the links of all the matches played in IPL 2020-21 is collected and stats of all the batsman played in the tournament is retrieved and store in the form of separate excel data sheets.
